Problems with register on the website?

Some people had problems with register on the website. They dont get any activation link or something else just doesnt work. If you have that kind of trouble just send me an email about it with your name and I will activate your account for you. Atm we have all kinds of spam users coming in and sometimes they are smart enough not to shine through as "not human".

So, any kind of problems with register or something else about the website just contact me at: lady_of_ice@icemachine.se
